Introduces

AKDUCT[®] HIGH VELOCITY Underground Duct System

- Air & Water Tight
- Easy to Install
- Quiet and Efficient
- Provides Even Room Temperatures
- Eliminates Drafts
- Impenetrable to Radon Gas

Installing an AKDUCT[®] High Velocity Underground Duct System guarantees the most efficient and quiet system on the market. High Velocity uses cutting edge technology to thoroughly aspirate the air, providing even temperatures throughout the room. No more air quality concerns, the entire system uses food grade polyethylene. No mold or mildew, and no additional framing or unsightly bulkheads.

Main Trunk Lines are available in
8" or 10" with 3" Lateral Runs
