Re: AK Duct

Dear Mr. Jungers,

We wanted to make you aware that we are very excited about this product that you offer. Ductwork that is applicable for cold and fresh-air make-up systems that we design is extremely valuable to us. The products that you offer meet the requirements that we need for our applications. No other products on the market meet these airtight, water tight, and easy clean needs, along with effortless assembly.

Our industry has needed a product such as yours for a long time. I have been in the business for 30 years and how nice to know that someone has finally created this. It will save time on installation as well as maintenance for the customer, ultimately saving them money.

It was nice conversing with you this morning. Hopefully we will have many years of business together.

Sincerely,

Rick Jarvis
President
