Jon W. Jungers

Dear Jon W. Jungers:

Since 1962, Strandlund Refrigeration, Heating and Cooling have been using only premium products offered by quality suppliers. We use exclusively the A.K. and Q.A. duct systems offered by CDC Enterprises, Inc. and sold by the SPS companies for our underground ductwork. We have found these products to be far superior to the old PVC duct systems, and have an economic and environmental benefit for our customers. With the ease of installation, and the benefit of being sealed and waterproof, greatly enhance its value to any consumer. We would recommend these products to any quality HVACR contractor and homeowners with out hesitation. Thanks for developing these great products Jon.

Sincerely,

James Strandlund
