

**Residential 3" to 18"**

**Commercial 20" to 36"**

- ✓ For Green Building Construction
- ✓ Meets All SMACNA Seal Classes
- ✓ Uses embodied energy @ R-10
- ✓ Self Insulated @ 95% Efficiency
- ✓ ICC PMG1023, IMC, UMC, IRC
- ✓ LA, California Approved
- ✓ Installs in half the time
- ✓ Complete Engineered System
- ✓ Non-Toxic & Corrosive Resistant
- ✓ Impenetrable to Radon Gas
- ✓ Air & Water Tight >10" w.g.
- ✓ UL-181 Section 11 (no mold growth)

## The Evolution Of Ductwork

Our PE plastic ductwork is benefiting the HVAC industry by providing an air system that is safe for humans and the environment. With the ease of installation and the advancement of being sealed and waterproofed, this greatly enhances its value to consumers. Our ductwork systems incorporate the next generation of thermal technologies to create a superior energy efficient product; a performance that meets the next-generation of air distribution systems.
